Partner with The Rebirth Odyssey

We don't simply promote products. We teach the next generation of Web3 users how to understand, evaluate and responsibly use them.

19,000+ LEARNERS ONBOARDED

35+ COUNTRIES

3 CHANNELS: TELEGRAM · X · WHATSAPP

ABOUT REBIRTH

An education ecosystem for Web3 talent

Who we are

The Rebirth Odyssey is a registered Web3 education and talent-development ecosystem founded by **Sir K.C. Onyekachi (Sir Khaycee)**, training learners across Africa and beyond.

1 Education

Live classes, practical demonstrations, tutorials and guided onboarding, so learners use a product with understanding, not on instruction alone.

2 Recommendation

We introduce relevant products during training, then keep recommending them through community discussions and educational content.

Our learners rely on us to tell them which Web3 products are worth considering. Because of that responsibility, **we prioritise credible platforms and long-term partnerships** over one-off promotions, and we evaluate every product before we introduce it.

WHO WE WORK WITH

Products our learners need as they grow

Our learners are building Web3 careers. Along the way they need tools to hold assets, get paid, trade, move money and do their work. Partners whose products serve those needs fit naturally into what we already teach.

01 Wallets and self-custody
Holding assets safely, backing up recovery phrases and managing crypto responsibly.

02 Exchanges and trading
How markets work, managing risk and using trading platforms with discipline.

03 Payments, on-ramps and off-ramps
Getting paid, converting between crypto and local currency, and moving money across borders.

04 Protocols and Web3 tools
Chains, dApps and the everyday tools learners use for research, building and remote work.

05 Hands-on with your product
Live walkthroughs of your product's real features, built into our lessons. Features, supported assets and availability are confirmed with you before each session.

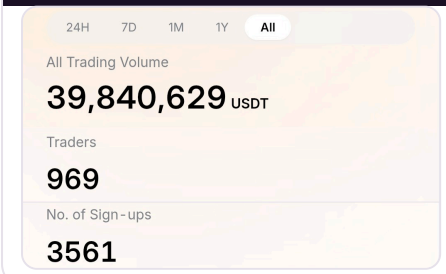

PROOF OF PAST ADOPTION

What our partnerships have produced

BYBIT — TRADING VOLUME

₦54.58B

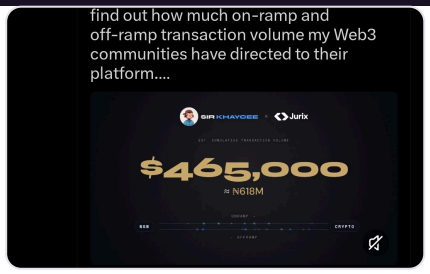

≈ $39.84M (39,840,629 USDT) cumulative, through founder-led community activity

JURIX — PAYMENT VOLUME

₦618M

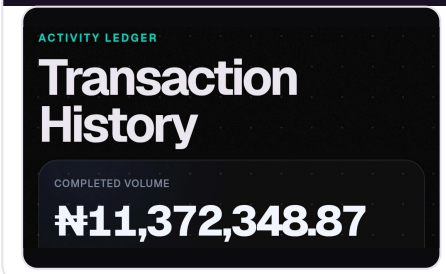

$465,000 est. on-ramp and off-ramp volume associated with our broader communities

RAMPHUB — PAYMENT VOLUME

₦11.37M IN 2 WEEKS

≈ $8,301 completed on-ramp and off-ramp volume, our newest partnership

Trading volume (Bybit) is the value of trades placed. **Payment volume** (Jurix, RampHub) is money moved between naira and crypto. Not all activity originated exclusively from Rebirth. Sources: Bybit affiliate dashboard; Jurix's public statement on X (13 Oct 2026); RampHub ledger. Dollar equivalents at ₦1,370 per $1. Historical only, not a forecast.

HOW A PARTNERSHIP WORKS

Education first, then adoption that lasts

Every campaign is built around your product and your goals. The components below are what a campaign can draw on. The final mix is agreed together, not a fixed or unlimited commitment.

01 · TEACH
Live educational sessions
Telegram classes that explain the problem your product solves, then the product itself.

02 · SHOW
Product demonstrations
Practical, on-screen walkthroughs of setup and everyday use.

03 · ONBOARD
Guided onboarding
Step-by-step support for interested learners trying the product for the first time.

04 · EXPLAIN
Content across our community
Videos, graphics and posts across all our community platforms, in plain terms.

05 · DISCUSS
Community recommendation
Ongoing discussion and recommendation in our Telegram and WhatsApp communities.

06 · SUSTAIN
Follow-up education
Refreshers and new-feature explainers that support informed, repeat use.

STEP 1
Align
Agree objectives, audience, products and how results are tracked.

STEP 2
Educate
Live sessions, demonstrations and guided onboarding.

STEP 3
Sustain
Ongoing content and recommendation across our channels.

STEP 4
Report
Share results and agree what to adjust or continue.

PERFORMANCE MEASUREMENT

What we track together

- **Session participation** — Attendance at live classes
- **Attributable sign-ups** — Via links or codes you provide
- **Completed onboarding** — Learners guided through setup
- **Activation and activity** — Where your reporting allows
- **Opt-in feedback** — Surveys learners choose to answer
- **Repeat use** — Only where reliably measurable

Learners' data stays theirs

We never ask learners for passwords, recovery phrases, balances or private account data. Measurement relies on attendance, opt-in responses and the attribution tools and aggregate reports you choose to share.

COMMERCIAL INVESTMENT

USD $3,000 to $10,000 per yearly campaign

The final investment depends on campaign duration, content production, the depth of educational integration, onboarding requirements and the level of ongoing community engagement.

To shape a campaign that works for both sides, we invite you to share:

01 Campaign objectives · 02 Timeline · 03 Preferred deliverables · 04 Budget allocation

Scope, deliverables and reporting are agreed in writing before the campaign begins. Results on page 1 are historical evidence of past partnerships only. We do not guarantee sign-ups, transactions, transaction volume or revenue.

Let's build something your users understand.

We would welcome a conversation about your goals for African Web3 users, and how our classrooms and communities can help reach them.
